**Clinical Experience**

I am a Clinical Psychologist working in a Community Child and Adolescent Mental Health Service offering developmental assessments and therapeutic services to families with children aged 0-18 years in a range of community settings. Until recently I worked in a multidisciplinary team assessing families in legal proceedings. Finally I work as an expert witness via Psychology4law. I have experience of supervising qualified clinical psychologists and providing training and consultation regarding mental health issues to non-psychology colleagues in statutory and voluntary organisations.
